

YELLOWSTONE NATIONAL PARK

Yellowstone was the first National Park in the U.S.A. The park is full of information that attracts millions of people go there. Yellowstone has lots of geysers, wildlife, and activities to explore.

Yellowstone has the Mammoth Hot Springs and Old Faithful which is a geyser. Yellowstone has 10,000 hot spring and 200 geysers. One is very popular, Old Faithful. At Old Faithful, hot water and steam erupt from the Earth to create an exciting shower or steam and water. Mammoth Springs is a place where a visitor can see water coming from the earth that is hot.

All these geyser and hot springs are located in Wyoming, Montana, and Idaho The park was established in 1872. Yellowstone has lots of activities like campgrounds where you can camp. There are ski trails that you can use in the winter. Yellowstone has spring biking and horseback riding. Yellowstone covers an area of 2,219,791 acres with tons of hiking trails.

Yellowstone there's lots of wildlife such as 300 wolfs. Don't get to close to the wild life because there are about 280-610 Grizzly bears along with black bears. The difference between black bears & grizzly bears is the length the bear. Bighorn sheep once numbered in the millions Bighorns are well adapted to climbing steep terrain.

Yellowstone is a wonder place with interesting activities and places to go.
